Paul Rardin . . . . Editor and Publisher BIG TIMBER

EIG TIMBER

"The Bir One" is now on display at a Longview, Wash, lumber mill. That's the mane given the largest ever logged by the Weyerhactser Timer Co. It was 256 feet high, contained more for build at least eight 5-room benses, Growth rings indicate the tree started in 1265.—Wall Street Journal.

A NATION'S INCOME
Writing for Monetary Notes, Professor
Walter E. Spahr of New York University
propounds a number of questions about national income and its relation to employ-

tions income any ars reason to employ-ment.

Just what is "national income"? Be seen concept measurable and is it measured sta-tistically with any accuracy? Does a farge "national income" cause spending, or is it the result of spending? What, specifically, the pools and, services sold, determines prices?

prices?

And where does greater production, savng and investment fit into these factors
is casual agents? Did not the "national inmome" of the German people reach fantastic
leights in 1921-23 when their currency was
perceialing rapidly and their spending
was frantic? Did great spending and great

'national income", in terms of their money, mean economic health or heavy employ-ment, or greater prosperity? Are not our "national income" figures in

mean economic health or heavy employment, or greater prosperity? Igures in
terms of money too? With our "national
income" now said to be roughly twice that
of the average year of the 1920's, are we
twice as well off?—Bradenton Herald.

AN ANNOYANCE

The radio networks have commendably
taken note of the justfied criticism against
radios bad habit of interrupting news
broadcasts with the so-called "plug-ugly"
middle commercials. What is more, thou
remainded in the property of the commercials of the property of the
remainded commercials. The so-called "plug-ugly"
middle commercials what is more, they
actually are going to do something about
them.

Elimination of commercial amountements from the middle of news brondensts on all National Broadcasting company ewned and operated stations has been an ended to the company. He points out that all sponsors of news programs have been requested to include their commercial amouncements within the first two minutes or the last three mustes of all 15-minute news programs have been requested to include their commercial amouncements within the first two minutes or the last three mustes of all 15-minute news programs.

hast three muties of all 15-minute news trograms.

A prominent American gave this advice to radio stations some years ago: "Advertising in the intrusive sense will dull the interest of the listener and will thus defeat the industry. Furthermore, it can bring disaster to Abe very purpose of advertising if it creates resentment to the advertiser.' These words are as true today as they were 29 years ago when they were voiced by Herbert Hower, then secretary of commerce. It is reassuring to note that radio is taking the 1925 advice to heart.—Tampa Tribune.

MirrApianos

The unique styling built into our fine Mirr-Apianos preserves their full musical tones in a beautiful, grateful setting. The eye sees a small piano, but the ear hears that sonorous musical tone that is possible only with adequate string length and generous sounding board area.

The MirrApiano involves no compromise with tone or touch. The mirrored tunett housing the pin plank and tuning pin assembly becomes a traditional room expanding wall decoration, rather than a part of the piano.

We now have a limited number of these fine planes available for immediate delivery, also some nice thoroughly reconditioned "shipped in" uprights. All fully guaranteed. Terms if desired.
